Initial Model Training Code, Model Validation and Evaluation Report

The initial model training code will be showcased in the future through a screenshot. The model validation and evaluation report will include classification reports, accuracy, and confusion matrices for multiple models, presented through respective screenshots.

Initial Model Training Code:

Model Bulding

```
[ ] from sklearn.linear_model import LogisticRegression
    clf = LogisticRegression()
    clf.fit(x_train,y_train)
```

LogisticRegression
LogisticRegression()

model 2

```
[ ] from sklearn.svm import SVC
    clf1 = SVC()

    clf1.fit(x_train,y_train)
```
